TABLE OF CONTENTS

0.0 EXECUTIVE SUMMARY	2
Over 70% of small businesses have taken out at least some form of business insurance.....	2
Employers' liability insurance is the type of cover most likely to be acquired by small businesses	2
Latent demand is highest for loss of rental income insurance and key man insurance	3
All kinds of business insurance are relevant in most sectors	3
Almost one third of small businesses acquire insurance for their business with total autonomy.....	3
... and they also show a tendency to opt most frequently for cover that they consider completely flexible.....	3
Over two thirds of small businesses with insurance pay premiums in excess of €1,000 each year....	4
Almost three quarters of small businesses with insurance work with more than one insurance provider.....	4
... which serves to further splinter a market that is relatively fragmented	4
A clear majority of sales of insurance to small businesses occur in a face-to-face environment.....	5
... although there is significant apparent potential for online aggregators to exert an influence in this sector	5
Almost a half of small businesses have taken out their main package during the last three years	5
The availability of lower premiums is the most common cue for switching insurance provider	6
Membership of professional and trade associations is much higher than for franchise organisations.....	6
A substantial number of association or franchise members contract business insurance through these channels.....	6
Among major providers of insurance, Provinzial attains the highest customer satisfaction ratings.....	7
1.0 INTRODUCTION	9
Research rationale	9
There are around 6 million enterprises with fewer than 250 employees in Germany.....	9
Using conventional techniques, the small business audience is tough to research... ..	9
... although the Internet methodology helps to circumvent many of the usual problems	9
The market for small business financial services is subject to rapid change	10
Research sample	11

2.0 INSURANCE OVERVIEW	18
Introduction	18
Holdings of any form of business insurance	21
Building and construction companies are most likely to be covered by business insurance	21
Small businesses without any insurance cover	24
More than half of uninsured small businesses believe that they have no need for insurance	24
Reasons of uninsured businesses for not holding any business insurance	27
The majority of uninsured small businesses believes that they are not exposed to high risks	27
Holdings of specific forms of business insurance	28
Employers' liability insurance is the most widely held form of cover among small businesses	28

The disparity between actual and desired cover is highest for loss of rental income insurance	28
Specific business insurance products	33
Holdings of forms of business insurance vary dramatically by type of enterprise	33
Evaluation and purchasing methods for business insurance	85
More than half of small businesses evaluate and purchase cover with at least some outside help ..	85
Expenditure on business insurance during last 12 months	86
Over 30% of small businesses holding insurance pay less than €1,000 in annual premiums.....	86
Flexibility of main business insurance package	87
Cover acquired by small businesses is normally characterised by complete flexibility	87
Number of business insurance providers used	88
Almost three quarters of small businesses with cover use more than one insurance provider... ..	88
Providers used for main business insurance package.....	91
Allianz is comfortably the market leader among providers of the main insurance package.....	91
... although the overall supply structure remains fairly fragmented.....	91
Providers used for other business insurance policies	93
Allianz is not quite as dominant in the area of secondary insurance products.....	93
Distribution interface used for main business insurance package	94
Most insurance bought by small business owners is acquired in a face-to-face environment.....	94
... although certain categories of small business show a high propensity to use remote channels ..	94
Distribution channel used for main business insurance package.....	97
For small businesses and self-employed individuals, agents are still the main distribution channel..	97
Respondents in the professional and financial services category are most likely to use a broker.....	97
Broker used (where relevant) for main business insurance package	100
No broker emerges as a clear market leader in the provision of the main insurance package	100
Bank used (where relevant) for main business insurance package	101
On a collective basis, the Sparkassen are the most effective commercial lines bancassurers	101
Interest in using online aggregators for business insurance	102
Well over half of small businesses appear open to the idea of using an online aggregator.....	102
Length of tenure of main business insurance package.....	103
Almost a half of business insurance packages have been bought anew in the last three years	103
Use of main business insurance provider for personal needs.....	104
Some respondents also use the provider of their business insurance for personal insurance	104
Frequency of contact with main business insurance provider	105
Most small businesses have one or two contacts per year with the main insurance provider.....	105
Period of time since last business insurance claim made	106
Self-employed individuals are far less likely to make claims than businesses with employees.....	106
Value of last business insurance claim made	109
Most business insurance claims made have a value of below €2,000.....	109
Likelihood of changing main business insurance package.....	110
Only a very small minority of the sample are definitely minded to change their insurance provider.....	110
Actual change of main business insurance package.....	113
The market for small business insurance is characterised by a relatively high switching rate.....	113
... although propensity to switch varies considerably by distribution interface and channel used...	113
The availability of lower premiums are most likely to prompt a change of insurance provider.....	118
Satisfaction with services offered by main business insurance provider	119
The majority of small businesses are broadly satisfied with the cost of their insurance. . .	119
... although around 10% express concern with most other aspects of their main insurer's service	119
Membership of professional or trade associations	122
Professional and financial services businesses are most likely to belong to an association.....	122
Membership of franchise organisations.....	125
Over 8% of small businesses responding to the survey belong to a franchise organisation	125
Usage of commercial affinity groups to contract business insurance	128

Commercial affinity groups are quite commonly used as a source of business insurance 128
 ... although penetration rates vary considerably by category of small business 128

3.0 INSURER PERFORMANCE.....132

Introduction 132
 The satisfaction of small businesses using each of the leading providers can be measured... 132
 ...both in overall terms and for ten key aspects of business insurance service..... 132
 The results for insurer performance are as robust as any that have hitherto been published 133
Accessibility of business insurance provider 134
Breadth and quality of business insurance products offered 135
