TABLE OF CONTENTS

0.0 EXECUTIVE SUMMARY	2
Research background and structure	2
In terms of the regularity of contact with consumers, Google comes first ahead of Aldi... ..	2
... although Deutsche Post possesses the largest outright number of customers	2
The brands of ADAC and Amazon inspire the most trust across all consumers... ..	3
... while the brands of energy companies have been damaged by rising electricity and gas prices...3	3
Apple, AvD and American Express achieve high scores for trust among their own customers	4
On average, consumers are most likely to take out travel insurance through the 80 organisations... ..	4
... with least interest being demonstrated for mortgages as a result of a number of factors	4
The 80 partner organisations researched can be grouped into five main categories... ..	5
... for which various conclusions can be drawn concerning their prospects in financial services.....5	5
Organisations with a smaller customer base often appear to be more efficient as affinity partners... .6	6
... with the larger German retailers not viewed widely as natural providers of financial services	6
However, successful partnership marketing is largely dependent upon effective execution	6
1.0 INTRODUCTION	8
Research rationale	8
Alternative providers have expanded into financial services in Germany in recent years.....8	8
... although it can be hard to evaluate the actual and potential efficacy of any given organisation8	8
<i>Partner Metrics</i> seeks to provide both an intellectual framework and robust, indicative data... ..8	8
... for both the full universe of respondents and actual customers of each of 80 organisations.....8	8
The choice of 80 brands has been influenced in part by developments elsewhere in Europe	9
Research sample	11
Strengths and weaknesses	16
The Internet research methodology is characterised by several advantages and drawbacks	16
Finaccord	16
<i>Partner Metrics and other consumer-focused studies</i>	16
<i>Affinity and partnership marketing publications for Germany</i>	17

2.0 PARTNER ANALYSIS	19
Introduction	19
Results from the <i>Partner Metrics</i> research are given for nine distinct types of financial service.....19	19
Consumer relationships and awareness	20
<i>Results for all consumers</i>	20
Among partners, Aldi lies second only to Google in terms of its profile with consumers... ..20	20
... with Deutsche Post, Lidl and eBay also featuring among the top five in this ranking	20
<i>Implied number of customers</i>	23
Only 6.8% of consumers claim to have no relationship whatsoever with Deutsche Post	23
Deutsche Post and Aldi are boosted by their huge volume of occasional customers	23
Consumer trust	27
<i>Results for all consumers</i>	27
Among the 80 entities covered, the brands of ADAC and Amazon are the most trusted... ..27	27
... with two of Germany's car makers also entering the top ten rankings for trustworthiness.....27	27

PARTNER METRICS: ALTERNATIVE PROVIDERS IN FINANCIAL SERVICES IN GERMANY

The brands of RWE and E.ON have been damaged by volatile energy prices.....	27
<i>Results for actual customers</i>	31
Three firms achieve a top five ranking for trust both among their own clients and all consumers... ..	31
... while Apple, AvD and American Express score especially well among their own customers.....	31
Travel firms tend to achieve relatively low scores for trust among their own clients.....	31
Motor insurance - actual and potential performance	35
<i>Results for all consumers</i>	35
ADAC achieves the highest percentage of consumers claiming actual or historic utilisation.....	35
guenstiger.de is perceived by many consumers as a possible source of motor insurance	35
<i>Results for actual customers</i>	38
AvD and Porsche score highly as distributors of motor insurance among their own customers	38
An average of 6.3% of drivers claim to have bought automotive manufacturer insurance	38
<i>Implied number of actual and viable customers</i>	41
Aldi and REWE could both be viable affinity partners for motor insurance in future.....	41
Household insurance - actual and potential performance	45
<i>Results for all consumers</i>	45
A significant proportion of consumers view ADAC as a viable source of household insurance	45
Aldi, Amazon and IKEA could credibly enter this market	45
Most organisations in the lower half do not currently offer household insurance.....	45
<i>Results for actual customers</i>	48
Porsche could potentially achieve a very high level of take-up among its own customers	48
Certain partner organisations are well-positioned to leverage the affinity of their customers.	48
... although it is far from certain whether eBay can sell household policies to its customer base	48
<i>Implied number of actual and viable customers</i>	51
ADAC possesses in excess of six million viable customers for household insurance.....	51
Travel insurance - actual and potential performance	54
<i>Results for all consumers</i>	54
Among all consumers, ADAC appears to be the best partner for travel insurance... ..	54
... with a range of other organisations challenging the position of specialist travel firms	54
Several retailers would struggle to achieve success in this field.....	54
<i>Results for actual customers</i>	57
Superior cross-selling rates mean that travel-oriented firms are the most efficient distributors	57
<i>Implied number of actual and viable customers</i>	60
Amazon and Deutsche Post could become significant distributors of travel insurance.....	60
Accident and health insurance - actual and potential performance	63
<i>Results for all consumers</i>	63
ADAC is the organisation that consumers are most likely to associate with these types of policy... ..	63
... followed by Quelle, American Express, AvD and Karstadt.....	63
<i>Results for actual customers</i>	66
Almost 10% of its members claim to have bought an accident or health policy through ADAC	66
<i>Implied number of actual and viable customers</i>	69
Implied viable customers exceed three million for eight organisations.....	69
Life insurance - actual and potential performance	73
<i>Results for all consumers</i>	73
The results for life insurance are broadly comparable to those for accident and health insurance ...	73
Of those already offering the product, Quelle achieves the highest score	73
<i>Results for actual customers</i>	76
The actual customers of Porsche and American Express are most likely to buy life insurance	76
Relative to equivalent networks elsewhere in Europe, Deutsche Post is a laggard in this field.....	76
<i>Implied number of actual and viable customers</i>	79
Three entities possess an implied number of actual and viable customers above four million.....	79
Credit cards - actual and potential performance	83
<i>Results for all consumers</i>	83
Amazon's credit card has achieved apparently remarkable take-up among consumers.....	83

PARTNER METRICS: ALTERNATIVE PROVIDERS IN FINANCIAL SERVICES IN GERMANY

The results suggest that there should be scope for Aldi to introduce its own co-branded card... ..	83
... with the same observation applying to several other retailer brands and even Die Bahn	83
<i>Results for actual customers</i>	86
A number of organisations boast apparently high take-up rates for their co-branded cards.	86
... including ADAC, Audi, AvD, Breuninger and Mercedes-Benz.....	86
... although future growth prospects for the EDEKA and Lidl payment cards appear doubtful	86
<i>Implied number of actual and viable customers</i>	89
The research suggests that demand for Tchibo and H&M payment cards could be significant	89
Mortgages - actual and potential performance	93
<i>Results for all consumers</i>	93
Consumers show limited interest in taking out mortgages through alternative providers.	93
... although Deutsche Post's experience in this market appears to have been reasonable	93
<i>Results for actual customers</i>	96
Several automotive brands could potentially extend their financial proposition to mortgages	96
<i>Implied number of actual and viable customers</i>	99
12 organisations score over two million implied actual or viable customers for mortgages	99
Consumer finance / personal loans - actual and potential performance	103
<i>Results for all consumers</i>	103
As a partner, Deutsche Post benefits from its long-established relationship with Postbank	103
While not currently active, Amazon and Aldi could also be viable distributors of personal loans ...	103
<i>Results for actual customers</i>	106
Entities with a smaller customer or supporter base are often more efficient as affinity partners ...	106
<i>Implied number of actual and viable customers</i>	109
Six entities score a number in excess of four million in implied actual or viable borrowers.....	109
Savings accounts - actual and potential performance	112
<i>Results for all consumers</i>	112
Only a minority of the 80 organisations surveyed currently offer their own savings accounts... ..	112
... with EDEKA ranked in the bottom half in spite of its long-standing ownership of EDEKA Bank	112
<i>Results for actual customers</i>	115
However, a number of organisations could consider entering the market for savings accounts ...	115
<i>Implied number of actual and viable customers</i>	118
Aldi, Amazon and PAYBACK all possess a relatively high implied number of viable customers ...	118
